Technical Data: CSH7553-50Y

Dimensions and Connections

Technical Data

Technical Data		
Displacement (2900 RPM 50 Hz)	197 m³/h	
Displacement (3500 RPM 60 Hz)	238 m³/h	
Weight	505 ka	

Max. pressure (LP/HP) 19 / 28 bar Connection suction line 76 mm - 3 1/8" 54 mm - 2 1/8" Connection discharge line

Oil type R1234yf/R1234ze(E)/R450A/R513A/R515B BSE170 (Standard) Oil type R134a/R407C/R404A/R507A/R407A/R407F BSE170 (Standard)

Motor data

Motor version Motor voltage (more on request) 380-415V PW-3-50Hz

79.0 A Max operating current Winding ratio 50/50

Starting current (Rotor locked) 206.0 A D / 355.0 A DD 52/0 kW

Max. Power input

Extent of delivery (Standard) IP54 Enclosure class

Oil heater 200 W (Standard)

Oil separator Standard Oil filter Standard Discharge gas temperature sensor Standard Start unloading Standard

Capacity Control - 4-step 100-75-50-25% (Standard) Capacity Control - infinite 100-25% (Standard)

Built-in check valve Standard

SE-E1 (Standard), SE-E3(Standard for 660-690V) Motor protection

Oil charge 14,0 dm³

Available Options

min / max OLC-D1-S (Option) Oil level switch

Discharge shut-off valve Option Suction shut-off valve Option Shut-off valve for ECO with muffler Option Liquid injection with integrated nozzle Option Bridges for DOL start Option Option with sound jacket Vibration dampers Option

Motor protection SE-i1 (200-690V)

Compact Screw Compressors CS

Reference points for evaporating and condensing pressures

Connection positions 1 (HP) and 3 (LP) on the compressor (see dimensions). The pressure drop for shut-off valves and check valves has not been taken into consideration. This is the worldwide state of the art for compact screws, as in factory-produced chillers shut-off valves are often omitted and the check valve can also be arranged as an external com-ponent in the discharge line. For the sake of the international comparability of performance data, this standard has been adopted for the screw compressors of the CSH/CSW/CSVH series.

ASERCOM certified performance data

The Association of European Refrigeration Component Manufacturers has implemented a procedure of certifying performance data. The high standard of these certifications is assured by:

- * plausibility tests of the data performed by experts.
- * regular measurements at independent institutes.

These high efforts result in the fact that only a limited number of compressors can be submitted. Due to this not all BITZER compressors are certified up to now.Performance data of compressors which fulfil the strict requirements may carry the label "ASERCOM certified". In this software you will find the label at the respective compressors on the right side below the field "result" or in the print out of the performance data. All certified compressors and further information are listed on the homepage of ASERCOM.

Legend of connection positions according to "Dimensions":

- 1 High pressure connection (HP)
- 2 Additional high pressure connection
- 3 Low pressure connection (LP)
- 4 Oil sight glass
- 5 Oil valve for maitenance (standard) / connection for oil equalisation (parallel operation)
- 6 Oil drain plug (motor housing)
- 7 CSH only, except CSH6583, CSH6593, CSH95103 and CSH95113: Connection for electro-mechanical oil level switch in case of replacing a CSH.1 by a CSH.3
- 8 Connection for opto-electronical oil level switch (OLC-D1-S) CSVH: integrated into FI control
- CS.105: connected to monitoring module
- 9 Oil heater with sleeve (standard) CSVH: integrated into FI control
- CS.105: connected to monitoring module
- 10 Oil pressure connection
- 11 External oil cooler connections (adaptor optional)
- 11a outlet to oil cooler
- 11b inlet / return from oil cooler
- 12 Oil temperature sensor (PTC) CSVH: integrated into FI control
- CS.105: connected to monitoring module
- 13 Economiser connection (ECO) (shut-off valve optional CSH: with pulsation muffler)
- 14 Threaded bore for pipe support
- CS.L line for ECO or LI
- CSVH:
- 14a line for ECO
- 14b line for FI cooling
- 15 Liquid injection connection (LI) (CSH: shut-off valve optional)
- 16 Earth screw for housing
- 17 Connection for oil and gas return (for systems with flooded evaporator adaptor optional)
- 18 Oil filter (maitenance connection)
- 19 FI cooling (liquid refrigerant)
- 20 Frequency inverter (FI)
- 21 Oil injection valve (internal)
- 24 Gas permeable plug
- SL Suction gas line
- DL Discharge gas line

Dimensions can show tolerances according to EN ISO 13920-B.
